INVESTMENT POLICY & AIMS

Value & Income Trust's ("VIT") policy is to invest in quoted UK equities, UK commercial property and cash or near cash. VIT does not normally invest in overseas shares or unquoted companies.

VIT invests in higher-yielding, less fashionable areas of the UK commercial property and quoted equity markets, particularly in medium and smaller sized companies. VIT aims for long-term real growth in dividends and capital value without undue risk.

PROPERTY COMMENTARY

OLIM Property specialise in commercial properties with long, index-related income streams to deliver strong, long-term real returns. VIT's property portfolio produced a total return of 8.0% over the year to March 2019, against 5.5% for the MSCI (formerly IPD) Index, the main benchmark for commercial property performance. The property portfolio is independently valued by Savills at the end of March and September each year; As at 31 January 2020 the total was £70,127,000.

All 26 Properties (28 tenancies): 100% let and income producing (MSCI void rate: 7.4%) on full repairing and insuring leases, with upwards only rent reviews and a weighted average unexpired lease length of 17 years (15 years if the tenants' break options are exercised). Sub Sectors: Industrial, Pubs/Restaurants, Other (Caravan Park & library), Leisure, Roadside, Supermarkets. No longer invested in shops or retail warehouses.

Contracted Index-related income: 86% up from 79% end of March 2019 (RPI-Linked increases 70%, Fixed increases 16%, open market reviews 14%).

EQUITY COMMENTARY

World stock markets started 2020 on a weaker note, unsettled by the potential impact of the Chinese coronavirus outbreak. The UK market, as measured by the FTSE All Share Index, fell sharply, down 3.3% on the month. This was, in large part, due to the index's heavy weighting in commodities; the oil price and other commodity prices were very weak in January on concerns about the economic impact of the virus on Chinese economic growth. The fund's equity portfolio underperformed in the month as domestically exposed shares, including Marston's, Restaurant Group and Lloyds Banking Group gave up the gains that they registered in the aftermath of the general election. Stronger stock performances came from the portfolio's defensive holdings; Pennon, United Utilities and Unilever all rose against the general trend for weaker share prices but these were not enough to offset losses elsewhere.

The UK left the EU at the end of the month but this will have little immediate economic effect. The shape of the UK's future trading relationship with the EU will no doubt concern investors but the economic outlook appears to be improving already. Business and consumer confidence are rising and there should be a significant fiscal boost if the new government enacts its manifesto spending promises.

Although UK investors enjoyed bumper returns in 2019 the UK stock market still looks attractive, particularly given the dividend yield of over 4%.
